“Aussie Native Dendrobiums and their Cultivation”

Our friends down under have been breeding their native Dendrobiums and creating some fantastic flowers, the word is out! Aussie Dens are easy to grow, tolerant of heat and cold, have fragrant flowers, and re-bloom from the old bulbs!!! They grow well with Cattleyas and in frost free areas they are perfect plants for the shade house. In conclusion we cover the ‘best practices’ for growing these remarkable plants. A PowerPoint presentation

Fred Clarke has been growing orchids for 33 years and has been hybridizing for 25 of those years. With over 25 years as a professional grower and manager in the horticultural industry, Fred applies these skills at his orchid nursery; Sunset Valley Orchids, located in San Diego, California.

He is a passionate orchid grower whose curiosity in orchids is broad and varied. Although developing Cattleya hybrids has been his sustaining interest, he is also actively creating new Aussie Dendrobium and Paphiopedilum hybrids.

His pioneering work in Catasetum intergeneric hybrids led to the development of several notable hybrids, most recently the grex, Fredclarkeara After Dark, which produced “the **blackest** flower ever witnessed”. This grex has received eight FCC’s, eight AM’s and the coveted ‘Award of Distinction’ on the first flowers shown for judging!

Fred is an Accredited Judge in the Pacific South Judging Region. His plants have received hundreds of quality awards from the American Orchid Society.
